Skills

- **Enterprise Networking:** Cisco Catalyst Center (DNAC), Cisco ISE, Cisco Catalyst (2960, 3750, 9300), Cisco Nexus 9300 (NX-OS), Cisco Catalyst 9800 WLC, Cisco APs (1832, 9120, 9166I), Cisco SDA, Cisco Meraki, Juniper EX Series, Juniper Mist
- **Routing & Switching:** OSPF, BGP, VLANs, VRFs, STP/RSTP, LACP, Port Channels, vPC, VXLAN EVPN, HSRP, VRRP, TCP/IP, IPv4/IPv6, DHCP, DNS, NAT/PAT, QoS, CAPWAP
- **Network Security & Zero Trust:** Cisco ISE, 802.1X, EAP-TLS, MAB, RADIUS, TACACS+, Palo Alto, FortiGate, Cisco ASA, Juniper SRX, IPSec VPN, GlobalProtect, Netskope (NPA, NIA), ZTNA, Device Hardening, VA/PT
- **Cloud Networking:** AWS (VPC, Subnets, Route Tables, Security Groups, NACLs, Internet/NAT Gateway, Site-to-Site VPN, CloudWatch, VPC Flow Logs), Microsoft Azure (Virtual Machines, VNets, VNet Peering, NSGs), GCP (Networking Fundamentals)
- **Automation & APIs:** Python (Netmiko, Paramiko), Ansible, REST APIs, Cisco NX-API, PAN-OS API
- **Monitoring & Observability:** Cisco ThousandEyes, SolarWinds, ServiceNow, Zabbix, SNMP, Syslog, FortiAnalyzer, FortiManager, Wireshark, One Engine, Rapid7

Experience

Senior Network Engineer

Velocis Systems Pvt Ltd
(Client: Indigo Airlines)

Gurugram, HR, IN **03/2026 - Present**

- Engineered and administered **Cisco ISE** across on-premises Policy Service Nodes (PSNs) and Azure-hosted deployments, delivering centralized AAA, identity-based access control, and policy enforcement for enterprise network access.
- Designed and implemented enterprise identity-based access architecture using Cisco ISE **Policy Sets**, Authentication & Authorization Policies, Microsoft Active Directory, **Catalyst 9800 WLCs**, dynamic VLAN assignment, and Downloadable ACLs (dACLs) for Employee, BYOD, and Guest networks, **RBAC**.
- Administered and troubleshooted Cisco Catalyst campus **switching** infrastructure, configuring VLANs, Trunking (802.1Q), EtherChannel (LACP), STP, Port Security, BPDU Guard, Root Guard, DHCP Snooping, and Dynamic ARP Inspection (DAI) to ensure secure and highly available campus networks.
- Implemented **802.1X (EAP-TLS)** authentication for enterprise users and MAC Authentication Bypass (MAB) for IP phones, printers, cameras, and IoT devices, while **integrating SureMDM, JAMF, Intune** for endpoint compliance validation.
- Configured RADIUS, TACACS+, endpoint profiling, certificate management, and Cisco ISE operational maintenance, ensuring secure authentication and centralized device administration..
- Deployed and administered **Cisco Catalyst Center** for network automation, assurance, Plug-and-Play (PnP), and SWIM, while integrating ServiceNow Event Management through Event Bundles and **REST APIs integrations** to automate incident creation and ITSM workflows.
- Implemented Cisco **ThousandEyes** Agents, configured Custom Webhooks, and enabled SAML 2.0 Single Sign-On (**SSO**) to improve network observability, centralized authentication, and automated alerting.
- Implemented **Netskope Private Access** (NPA) and **Netskope Internet Access** (NIA) to enable Zero Trust Network Access (**ZTNA**), deploying Publishers on **Azure** Virtual Machines and configuring **VNets, VNet Peering**, and Network Security Groups (**NSGs**) for secure application access.
- Administered **FortiGate, FortiManager, and FortiAnalyzer**, managing **SDWAN**, IPSec Site-to-Site **VPNs**, firewall policies, high-availability configurations, and troubleshooting Phase 1/Phase 2 VPN negotiations.
- Leveraged **SolarWinds**, Cisco ThousandEyes, and ServiceNow to proactively monitor enterprise infrastructure, accelerate fault isolation, and improve Mean Time to Resolution (MTTR) across production environments.
- Served as escalation engineer for Priority-1 and Priority-2 incidents, performing Root Cause Analysis (RCA), implementing production changes, and **collaborating** with Cisco, Fortinet, Netskope, Microsoft, and F5 TAC teams to restore mission-critical services within SLA.
- Supported secure enterprise network operations across distributed airport environments, maintaining high availability for mission-critical aviation infrastructure.

Network Security Engineer

Tata Consultancy Services

Kolkata, WB, IN

7/2021 - 03/2026

- Administered **750+ Cisco Catalyst and Nexus switches** across **150+ hub rooms**, supporting **25,000+ enterprise users** within a highly available campus network infrastructure.

- Engineered Layer-2 and Layer-3 enterprise networking utilizing **OSPF, VRFs, HSRP, VRRP, VLANs, Port-Channels, LACP, STP, vPC**, while working with **Cisco Nexus NX-OS** environments and gaining exposure to **BGP** and **VXLAN EVPN** in data center deployments.
- Configured Cisco Nexus data center infrastructure including **vPC**, Layer-3 routing, high availability, and leaf-spine networking concepts to improve network resiliency.
- Deployed and administered **Cisco DNA Center (DNAC)**, automating switch provisioning through **Plug-and-Play (PnP), Zero Touch Provisioning (ZTP)**, templates, and **SWIM** image management to standardize enterprise deployments.
- Integrated **Cisco DNA Center** with **ServiceNow Event Management** by enabling Event Bundles and REST API-based synchronization, automating network fault correlation, incident creation, and ITSM workflows.
- Utilized Cisco DNA Center Assurance tools including **Client 360, Path Trace, Network 360, Wi-Fi RSSI, and KPI dashboards** to troubleshoot wired and wireless performance issues.
- Implemented **Cisco ISE** integration with Microsoft Active Directory, enabling **802.1X authentication**, dynamic VLAN assignment, identity-based access control, and centralized policy enforcement.
- Administered enterprise security infrastructure comprising **Palo Alto, FortiGate, Cisco ASA, and Juniper SRX** firewalls, configuring IPsec VPNs, GlobalProtect, NAT policies, security zones, object-based policies, and high-availability deployments.
- Remediated multiple **critical Vulnerability Assessment and Penetration Testing (VA/PT)** findings, strengthening enterprise security posture and compliance.
- Configured **AWS networking** including **VPCs, Subnets, Route Tables, Internet Gateways, NAT Gateways, Security Groups, Network ACLs, VPC Flow Logs, CloudWatch**, and **Site-to-Site VPNs** supporting hybrid enterprise connectivity.
- Developed **Python automation** using **Netmiko, Paramiko**, and REST APIs to automate configuration collection, compliance validation, and network audit reporting across enterprise devices.
- Developed **Ansible Playbooks** for network provisioning, configuration backup, and compliance verification, reducing manual operational effort by **30–40%**.
- Leveraged **PAN-OS APIs** to automate firewall policy management, security object provisioning, and operational tasks across Palo Alto environments.
- Configured and managed **Cisco Meraki, Juniper Mist**, and enterprise wireless infrastructure for multi-site deployments, centralized management, and wireless client troubleshooting.
- Monitored enterprise infrastructure using **SolarWinds, Zabbix, Syslog, SNMP, and One Engine**, enabling proactive fault detection, performance monitoring, and faster incident resolution.
- Collaborated with infrastructure, cloud, security, and operations teams to deliver enterprise networking projects, production changes, and complex incident resolution across large-scale environments.

Education

Bachelor in Computer Application

Amity University

Patna, BR, India **08/2018 - 12/2021**

- Major in Computer Science **8.3 CGPA**

Projects

- **NetBox Implementation:** Proposed and executed the transition from traditional IP storage methods to NetBox. Single-handedly deployed and configured NetBox on RHEL 8, replacing legacy systems with a contemporary open-source IPAM solution, significantly enhancing IP address management, and network operational efficiency. **(05/2024)**
- **Campus Wide Migration to Juniper Mist:** Migrated 25,000+ users from Cisco to Juniper Mist ap, resulting in enhanced **performance, advanced AI driven analytics, scalability, cost savings**, and an improved user experience. **(02/2024)**
- **Pnp Server with Python - In-Progress**
Building a PnP server to automate network device onboarding, inspired by Cisco's Plug and Play model.

Mentorship

- **Google Solution Challenge:** Mentored 17+ student groups in the Google Solution Challenge 2023, offering strategic advice, technical insights, and hands-on support to build innovative Flutter prototypes. **(11/2023 - 11/2023)**
- **SIH :** Mentored teams at **Smart India Hackathon (SIH)** on network security, guiding them to develop secure and compliant solutions for cybersecurity challenges. **(10/2024 - 11/2024)**

Certification

- CCNA | JNCIA Junos | Google Cloud Certified Professional Cloud Architect. & ACE **(04/2023)** [All Certifications](#)
- Planned NSE 4 Fortinet
